

5033 5 Band EQ - Front Panel

Q Control

Adjusts the curve of each EQ, with smaller numbers being wide, and larger numbers being sharp

Frequency Control

Adjusts the center frequency of each EQ

All Bypass

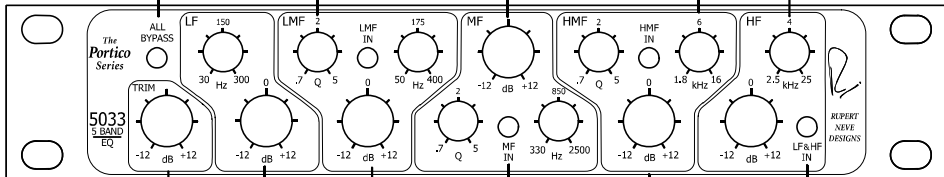

Removes all EQ from the signal path, leaving input, output, and level trim

Mid Parametric EQ

Fully parametric control of "Q" and frequencies from 330 to 2500Hz

High Shelf

Fully variable from 2.5 to 25kHz

Low Shelf

Fully variable from 30 to 300Hz

IN

Each parametric EQ individually engages using the IN buttons

LF&HF IN

Engages both Low and High Shelf

Input Trim

Adjust input +/-12dB for level matching

Low-Mid Parametric EQ

Fully parametric control of "Q" and frequencies from 50 to 400Hz

High-Mid Parametric EQ

Fully parametric control of "Q" and frequencies from 1.8 to 16kHz
