

Gemma's Passive Quad Monitor Controller

VOLUME: Controls level of selected input audio to selected output

AUX in:
Stereo 1/8"
Mini TRS
available
for plugging
in the output
of a phone,
laptop, etc.

MONITOR: Three-position switch selects FAR (farfields), MUTE (middle position), or NEAR (nearfields). Farfields can be used for monitoring STEREO or QUAD sources.

INPUT: Three-position switch selects QUAD, STEREO, or AUX as the input source.

QUAD is normalled from the Soundcraft's Group 1-4 Outs and its inputs are also available on the Patch Bay; STEREO is hard-wired to the Control Room Output of the Soundcraft.
